## Product discontinuation easy500

Bonn, 16<sup>th</sup> of December 2019

Ladies and Gentlemen,

In the below statement we are informing you about the product discontinuation of the easy 500 as of 31.12.2019.

The current easy500 product range will be replaced by the new easyE4 product range. The new easyE4 series makes it possible to seamlessly replace the easy500 series. Applications will benefit directly from the new easyE4, a significantly more powerful series, with its modern, future-oriented functionalities.

The new easyE4 series enables not only the simple transfer and conversion of existing projects into the new easySoft 7, but also a far-reaching replacement of the applications implemented within the predecessor series. Existing easySoft6 programs of the easy500 series can be transferred to the new easySoft7 without problems and with very little time expenditure.

The rationale behind this product discontinuation is the discontinuation of non-replaceable components. The unexpectedly high demand in recent months has unfortunately forced us to discontinue our products at short notice.

In order to provide the best possible support for the changeover, an e-mail address has been set up. Customers can send their existing easySoft 6 program to us [easy@eaton.com](mailto:easy@eaton.com) and will then receive, by return, a converted easySoft 7 program.

In addition to this, a special activation code was generated which can be used directly in easySoft7 and fully unlocks the software. The code is: GMHWPI9X>=XYPL9HS56>9X24

The following products will be discontinued by 31.12.2019 and orders for the products from 01.01.2020 will no longer be accepted:

For further questions please contact our product management and product support in Bonn at any time.

Yours sincerely

Sascha Lindemann  
Produktmanager easy Control Relais  
EATON Industries GmbH  
Electrical Sector EMEA

## Sales Information

### Product changeover easy500/700/800 & MFD-... to easyE4-...

Bonn, 29.05.2019

Ladies and Gentlemen,

The previous product range easyRelay and MFD-Titan will be replaced by the new easyE4 product range. This will be done directly or through future projects. The new easyE4 series will enable us to offer the customer a significantly more powerful device with modern functionalities at a competitive price.

A small part of the previous portfolio (MFD-80..., MFD-CP8/CP4, bus modules) cannot be directly replaced by the new easyE4 portfolio at the moment. Successors have already been defined for some of these types and development has already begun for the most part. Unfortunately also for these parts we are forced to discontinue these articles.

The reason for this announcement is the increasing discontinuation of non-replaceable components for an aged and difficult to maintain portfolio.

The new easyE4 series enables not only the simple transfer and conversion of existing projects into the new easySoft 7, but also the capability of out reaching replacement of the applications realized with the predecessor series.

In order to be able to cover the expiring life cycle of the easyRelay and MFD-Titan series, we have initiated the stocking of several discontinued components. For some components, we already had to place a last-time buy in 2018. The phase-out data below refer to the current sales figures, the remaining quantities of components already purchased and an assumed phase-out curve. However, this process is subject to continuous fluctuations and therefore requires regular adjustments. In order to accompany this process with the greatest possible transparency, we as a product line will provide a regular outlook on the availability of the various articles. More information will follow in the coming weeks.

Powering Business Worldwide

The following products will be discontinued on **31.12.2019** and will no longer be available:

Material	Type	Status	Successor Products
Y7-110940	EASY430-POW	Successor available	Y7-212319   EASY400-POW or PSG portfolio
